

Buildings and Structures for Councils and Shires

ENGINEERED INNOVATION

18m x 120m long span maintenance and storage shed.

Playground Covers

Improve the quality of the shared spaces in your region!

In a world where usable spaces are at a premium, making yours utilisable for all weather conditions is now becoming a necessity. With a range of roof styles, architectural steel types and colours, Spanlift will have a solution to enhance your community space.

Spanlift have unique designs to address ergonomics and aesthetics, including elimination of sharp edges at the interaction level. Provide protection from harmful UV rays and inclement weather with all-weather play areas for families who live in your region and those travelling through.

Basketball Court Cover

Rounded Column Optional

Fabricated Premium Steel

Create Community Space!

Spanlift is your safest option, our optional round beam design minimises the risk of human injury. Our clever "out of reach" design keeps all bracing safely out of harms way.

Each one of Spanlift structures are site specific engineered to accommodate design loads suited to the relevant use. For example the shade structures erected in a public place are engineered to sustain severe wind loads in view of protecting and sheltering people in the event of a storm.

Make contact with our consultants who will assist you in advancing the design of your new public shade and shelter area.

Curved roof over courtyard

12m x 15m curved roof

Saleyard Covers

30m x 15m x 30m clear span x 144m

Make a statement with your livestock exchange!

If you're looking to increase sale yard volume, while providing a safe working environment, covered sale yards is an excellent long term decision.

- › Catch water for re-use
- › Provide shelter for customers and workers
- › Put down soft floor for livestock as covers provide protection from rain, and UV damage to the flooring
- › Shelter lowers risk of heat stress and benefits animal welfare
- › Provide all weather auctions in your town

Covered Sports Arenas

68m clear span x 110m long x 11m high

BMX Tracks, Skate Parks, Playing Courts, etc.

Provide all weather sporting options and save on expensive track and court re-work by factoring in cover. Provide lighting for community safety, with various water catchment options available.

Spanlift has proven experience providing nationally recognised buildings, such as the Palmerston BMX Stadium.

- › Attract major events
- › Provide club facility's
- › Increase community engagement to retain the population
- › Keep youth engaged in sports, provide safe, well lit community spaces.

30m x 15m x 6m

Custom designed start ramp

35m x 24m

21m x 30m x 4.5m

30m x 15m x 6m

Works Depots

50m x 24m x 6m

Increase efficiencies across your council or shire by providing leading edge facilities.
Avoid early shut downs and weather delays by providing a space for staff to work, unaffected by weather.

- > Mezzanines
- > Overhead cranes
