

# Dairy Farm - Shed Guide

ENGINEERED INNOVATION

*36m x 24m x 4.3m, with Ridgevent housing a 50 stand rotary.*

# Milking Parlour

33m x 24m x 4.3m, with ventilation housing a 50 stand rotary.

*Make a statement about your farms future!*

Spanlift has built many dairy parlours. We have a library of engineering that is customised around platform sizes and typical designs.

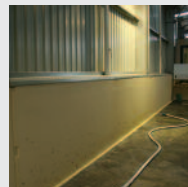

No need to worry about early corrosion of your building if it is a Spanlift Shed. Using hot dipped galvanised trusses 100% BHP Australian Steel, with a 50 year structural warranty, we have your dairy equipment covered.

Sliding Doors

Roller Doors

For ease of clean out and hose down, we offer optional concrete walls, internal wall lining in zinc or colour bond. With options available including, extended roof cover to help protect 'cups on' areas, lifting beams to rectify down cows on the rotary, lined vat room, milk tanker access doors and wide openings available for ease of access, we can build the exact shed you need, or choose from our pre-designed plans.

Spanlift will bring experience and expertise to the table to ensure your new dairy will exceed all expectations.

39m x 26m x 5m.

45m x 36m x 5m.

39m x 26m x 5m, with Ridgevent housing a 60 stand rotary.

# Cow Barn

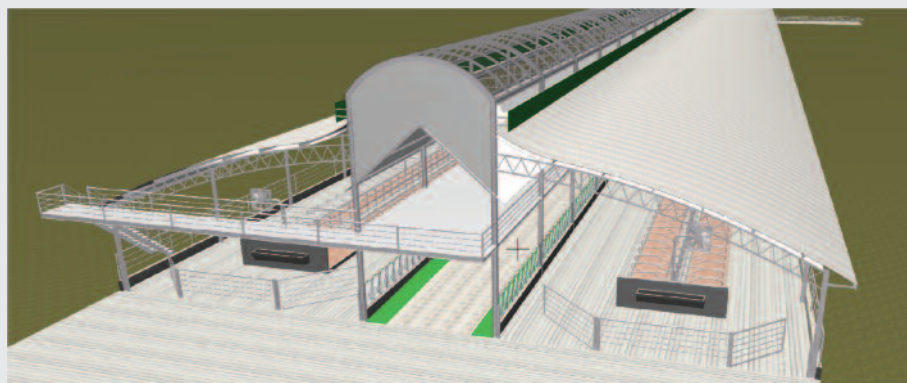

125m x 30m x 5m complete with overhang to suit feedcart.

*Increase your productivity, efficiency and profitability with a Spanlift Barn.*

If you're looking to increase your farms productivity and profitability, chances are a "free stall barn" or a "compose barn" is the next step to take.

With a Spanlift shed you can reduce herd walking distance, provide shade and shelter, control effluence, and catch rain water.

Your investment starts with careful planning including the structural design and stormwater disposal. Spanlift has experience to accommodate small through to large scale cow barn designs.

# Hay Sheds

45m x 15m x 5m hayshed with 7.5m bays.

*Remove the uncertainty from your season*

On farm fodder storage is now an essential for farming. With fluctuating prices, farms that invest in security of feed supply and large quantity bulk storage can help minimise risk.

Spanlift sheds are made with 100% BHP Australian Steel, and come with a 50 year structural warranty, ensuring a long lasting investment with fast returns.

Options available include, large bays to suit hay bale sizes, roof heights to suit handling equipment, and bale bumpers for rear walls, we can build the exact shed you need, or choose from our pre-designed plans.

# Calf Sheds

*Protect your little ones, with Spanlift's calf sheds*

Improve calf outcomes by building an open or partially enclosed housing shed. Perfect for cooling and shade in the summer. The closed sides protect calves from prevailing winds and rain in winter.

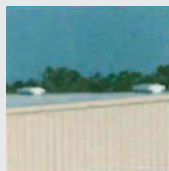

Spanlift takes natural ventilation at the calf level into account, offering several options for improved ventilation.

A purpose built calf shed by Spanlift will be custom designed and can include any of the following:

- › Doors to suit drive through and clean out
- › Gate and pen hinges welded onto columns
- › Louver, ridge or wall vents
- › A storage area for feed, medications and equipment
- › Hot dipped galvanized columns
- › Optional galvanized UB rafters
- › Internal wall lining

45m x 15m x 5m calf shed with drive through access.

Consideration is given to shed orientation to limit sun exposure and maximise weather protection for the calves.

# Create a dairy shed system on your farm that works for you

- › 100% Australian BHP Steel
- › Hot dipped galvanized steel
- › Manufactured in South Australia
- › 50 year structural warranty
